Local manufacturer hopes to *soar* above a failing industry.

July 14, 2009

Deerfield Beach, FL – Amidst an economy in which the manufacturing industry has been hit hard, a local manufacturer’s recent international certification may set it apart from the host of shops that recently have closed their doors. LIGI Tool & Engineering announced today its certification to AS9100, the International Aerospace Quality Standard.

In an industry that has seen employment fall by 1.9 million during the recession – 136,000 in June alone – the certification is critical to machine and tooling companies interested in producing parts for major manufacturers. Large manufacturers such as Boeing and Lockheed Martin require subcontractors to be AS9100-certified in order to work on certain aerospace parts.

“This certification will increase our customers’ confidence that LIGI’s process-oriented approach will meet or exceed their highest quality requirements,” explained Domenic Mucciacciaro, LIGI founder and CEO.

The stringent requirements of AS9100 certification assure that compliant manufacturers are in lockstep, providing the same level of high-quality products and services.

“Attaining certification represents LIGI’s endless commitment to producing precision workmanship and parts of the utmost quality, particularly in the aerospace industry,” Mucciacciaro said.

In 1999, LIGI was heavily involved in the manufacturing of precision-machined parts for the International Space Station. As a result of delivering 100 percent defect-free parts, the company was nominated by Boeing to compete in, and subsequently won, the Small Business Association’s “Award for Excellence” for the U.S. Southeastern sector. LIGI’s AS9100 certification could assist in expanding its relationship with Boeing and other large manufacturers.

AS9100 is based on the ISO 9001:2000 quality management standard, but entails an additional 80 requirements and 18 augmentations specific to the aerospace industry.

Founded in 1983, LIGI TOOL & ENGINEERING, INC. is a leading machine shop in South Florida. It operates state-of-the-art, fully computerized manufacturing equipment, and offers vast know-how, capability and manufacturing expertise.

PERRY JOHNSON REGISTRARS, INC.

Certificate of Registration

Perry Johnson Registrars, Inc., has assessed the Quality Management System of:

LIGI TOOL & ENGINEERING, INC.
3220 SW 15th Street, Deerfield Beach, FL 33442 United States

*(Hereinafter called the Organization) and hereby declares that
Organization is in conformance with:*

ISO 9001:2000 and AS9100:2004 Rev. B

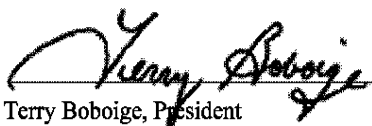

This Registration is in respect to the following scope of supply:

**Manufacture of Precision Machined Parts and Assemblies Per Customer Specifications
for the Commercial and Aerospace Industries**

(The assessment was performed in accordance with AS9104A. PJR is accredited under the aerospace Registrar Management Program.)

Such products shall be manufactured by the Organization at, or such processes or services shall be offered at or from, only the address given above. This Registration is granted subject to the system rules governing the Registration referred to above, and the Organization hereby covenants with the Assessment body duty to observe and comply with the said rules.

For PJR:

Terry Boboige, President

Perry Johnson Registrars, Inc. (PJR)
26555 Evergreen, Suite 1340
Southfield, Michigan 48076
(248) 358-3388

The validity of this certificate is mandated through ongoing surveillance.

Effective Date:
June 24, 2009

Expiration Date:
June 23, 2012

Certificate No.:
C2009-01706
